Art Unit: 1732

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3, 5, 12, 13, 24-29, 35-38 and 42 drawn to a molding die, method of making same and method for making an IOC, classified in class 264, subclass 1.24.
- II. Claims 6, 7, 9-11, 15, 16, 18-23, 30-34, 39, 40, 41 and 43, drawn to a molding tool, method of making same and method of making an IOC, classified in class 264, subclass 1.6.

The inventions are distinct, each from the other because:

Inventions I and II are separate or distinct in that the claims of Group II call for the die/substrate to be contained on the surface of a roller to allow for continuous operation while those of Group I do not.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Parsons on April 16, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Comments directed to the rejection of September 11, 2003 and amendment of January 16, 2004 will be held in abeyance pending an election.
